

VISUAL VOICE MAIL VALUE IS WHEN IT WORKS WITH YOUR OFFICE SYSTEM

Visual Voice Mail! Everyone is talking about it, and almost every provider claims they have it. Big deal! Not one of them provides support for your office voice mail! It's currently a great toy, or limited to cell phone users, until now. Esnatech extends the value of visual voice mail to your business. With Esnatech Telephony Office-LinX™, not only can you access and read your voice mail from any device, but connect with your office e-mail platform, office voice mail, and mobile devices for anywhere access to a single inbox to manage all your messages.

Law firms, medical clinics and financial firms can now search voice mail and conversation based on key words. Combine Esnatech's Visual Messaging feature with its support for Google™ Applications and now you have the greatest archiving and search technology around enterprise communications! This is not future technology; this exists and is available today from Esnatech's Unified Communication platform!

KEY VALUE OF VISUAL MESSAGING WITH OFFICE VOICE MAIL:

- * View voice mail messages as text on a Blackberry, Windows Mobile, iPhone, computer or cell phone
- * Ideal for small business owners, entrepreneurs and busy professionals, scan messages quickly to locate the most urgent and take action
- * Text is searchable using text searching tools perfect for legal and medical industries
- * Sort, copy, paste, print and forward features

A business executive spends an average of 45 minutes per week checking voice mail; that's 3hrs per month, per person spent on non-revenue producing activity. Telephony Office-LinX is a business productivity tool. The Visual Voice Mail service allows users to spend less time checking voice mail and more time closing deals. The service enhances CRM because names, numbers and calls are all stored and searchable through the Telephone Office-LinX Web Client and synchronized with popular email platforms such as Microsoft Exchange, and Google Applications. Being able to respond to time sensitive voice mail as quickly as possible will increase productivity and revenue. Telephony Office-LinX is integrated with all major phone systems and business applications such as Cisco, Avaya, Nortel, Microsoft, Google, Salesforce etc.
