eOn eNterprise IP Messenger Supports the RIM BlackBerry®

Esnatech & eOn Communications Launches Mobile UC Client Software at the Blackberry App World!

SAN JOSE, CA (July 28, 2009) - eOn Communication Corporation™ (NASDAQ: EONC), a leading provider of telecommunications solutions, and Eсна Technologies Inc. (www.esnatech.com) today announced that they have launched a version of their market leading mobile unified communication software for the eOn eNterprise IP Messenger for the RIM BlackBerry devices in the BlackBerry App World (www.blackberry.com/appworld/). The Mobile UC Client provides a complete communications & collaboration solution for mobile users, integrating presence, messaging, mobility and computer telephony to users over mobile devices. The integration of unified communications onto these wireless devices will dramatically increase the ability of mobile users to connect to the office and be able to communicate as if they were at their desk. Esnatech and eOn Communication Corporation™ has released a version specifically for BlackBerry users in the app world that have the eOn Millennium and eQueue IP telephony platforms. eOn users can easily access this free mobile app directly on their device. Once installed in conjunction with eNterprise IP Messenger server they can link their devices to their office phone system and leverage the BlackBerry as their office communication device.

"At eOn our goal is to help organizations of all sizes be more productive by enhancing communications between management, staff, remote workers and customers while reducing costs and driving revenue streams. Through mobility solutions provided by eOn's eNterprise IP Messenger coupled with wireless devices such as BlackBerry, we're able to offer our customers anytime, anywhere connectivity with presence management tools that improve employee productivity and foster profitable relationships with their clients and partners," said eOn Vice President of Sales, Jack Dienno. "We realize that during these economic times every phone call is critical to the bottom line and our job is to provide seamless connectivity with any mobile device regardless of location or infrastructure."

"With this joint release for the eOn eNterprise IP Messenger platform we provide enterprises the opportunity to offer full enterprise communications to BlackBerry users," said Davide Petramala, Vice President Business Development at Esnatech. "Blackberry users can now seamlessly manage all there office communications directly from their device such as find me follow me, presence and instant

messaging! This puts Esnatech and eOn in the market leadership position when it comes to a complete Mobile UC solution for enterprise users.”

With the new Mobile UC Client software users of eOn’s eNterprise IP Messenger would have access to the following features directly from their BlackBerry device:

- Users can manage their office presence and live location to better communicate with customers and co-workers.
- Users can define their presence even when on their BlackBerry to their colleagues in the office.
- See and find the presence and availability of colleagues in the office.
- Initiate and or participate in enterprise instant messaging sessions (fully logged and tracked for auditing purposes).
- View complete call history, including real-time view of inbound, outbound and missed calls to and from your office phone.
- Manage live office calls directly from their BlackBerry.
- Initiate station to station and live calls from their BlackBerry using their office phone system as the resource, dramatically increasing productivity while controlling costs and maintaining controls and audits on mobile communication usage.

- The new mobile application downloads directly from BlackBerry App World to the user’s BlackBerry RIM device and connects via IP to the eNterprise IP Messenger that is connected to both the enterprise PBX and e-mail platform. Users will have the ability to view their work groups and see who is online and available. With access to real time status they can then chose the best way to communicate with co-workers. This will dramatically improve the connectivity of the wireless users to their office environment and improve productivity by deliver anywhere anytime access to critical resources.

The new Mobile UC Client software for the RIM BlackBerry is available as a free download for a limited time from the BlackBerry App World store that can be accessed directly from users’ devices or from the web (www.blackberry.com/appworld/) by simply searching for Esnatech, or UC Client.

About the eNterprise IP Messenger

The eNterprise IP Messenger offers the industry’s most robust unified communications platform that integrates presence, mobility and messaging with eOn’s Millennium and eQueue communications platforms. It provides today’s enterprises and contact centers with a suite of applications comprised of voice messaging, unified messaging, fax services, instant messaging, CTI functionality, mobility and presence solutions. Using state-of-the-art text-to-speech and speech recognition technology, the eNterprise IP Messenger ensures access and utilization of all of your messaging and scheduling utilities is only a phone call away. Aimed at improving relationships and interactions between employees, customers and suppliers, the eNterprise IP Messenger makes it possible for you to manage your communications anytime, anywhere from any device.
