

The Teltronics 20-20(R) Communication System Integrates With SIP-Based Unified Messaging Platform

Friday November 17, 6:00 am ET

The Introduction of a SIP-Based Solution Provides a Cost-Effective and Seamless Integration of Unified Messaging to Teltronics' Robust and Innovative 20-20 Communications System.

SARASOTA, Fla., Nov. 17 /PRNewswire-FirstCall/ -- Teltronics, Inc. (OTC Bulletin Board: [TELT - News](#)), a premier provider of communication solutions and services, announced the integration of the Esna Technologies, Inc. (Esnatech) SIP-based unified messaging (UM) platform, Telephony Office-Linx (ToLee), to the IP-enabled, 20-20 telephone switch. The integration of SIP-based UM eliminates the need for costly, analog voice cards in favor of cost- competitive and full-featured IP cards.

Executive Vice President of Sales and Marketing, Richard Begando, said, "SIP integration reduces the cost of hardware, provides flexibility in terms of deployment location and remote site support, and also lends support for high-availability and resiliency initiatives." He continued, "SIP allows Teltronics to provide a cost-effective and seamless integration into different business applications and deliver real-time availability of content from any access point to our customers."

Moving the 20-20 toward the future and expanding its current offerings, makes the 20-20 the ideal solution for large enterprises that value systems that can grow and change as business grows. Teltronics plans to leverage its future development for telephony, video and unified communication solutions using the SIP protocol. Teltronics will continue to offer ToLee in both traditional and SIP format for connection to the 20-20 product line.

ToLee is tightly integrated with Microsoft Windows, Exchange, Office, Terminal Services and Outlook to provide a fully integrated unified messaging solution.

About Teltronics:

Teltronics, Inc. is a leading global provider of communications solutions and services that help businesses excel. The Company manufactures telephone switching systems and software for small-to-large size businesses, government, and 911 public safety communications centers. Teltronics offers a full suite of Contact Center solutions - software, services and support - to help their clients satisfy customer interactions. Teltronics also provides remote maintenance hardware and software solutions to help large organizations and regional telephone companies effectively monitor and maintain their voice and data networks. The Company serves as an electronic contract-manufacturing partner to customers in the U.S. and overseas.
